

Irene (Yu Ying) Wu

New York, NY (Open to relocation) | 929-622-0923 | yuyingwu1998@gmail.com | [LinkedIn](#) | [Github](#)

Education

Cornell Tech, Cornell University

New York, NY

MS in Applied Information Science & Information Systems

May 2027 (Expected)

- Merit-based scholarship recipient | Certificate candidate in Computer Science | Student Ambassador
- Coursework: Machine Learning Engineering, Human-Computer Interaction and Design, Interactive Device Design, etc.

National Chengchi University

Taipei, Taiwan

BS in Management Information System, GPA: 3.91 | Minor in Accounting | Extra Studied in FinTech Program

Jun 2022

- Coursework: Digital Innovation, System Analysis and Design, Database Management, Data Structure & Algorithms, etc.

Technical Skills & Certifications

- **Programming Languages:** Python, Java, SQL, JavaScript, HTML, CSS
- **Framework & Libraries:** Pandas, NumPy, Matplotlib, React
- **Project Management Tools:** Axure, Draw.io, Figma, Notion, Tableau, PowerBI, Jira, Confluence, Redmine, Git, Github
- **Certifications:** IBM Badges - Design Thinking, Agile, UI/UX, Communicating, Software Engineering, Cloud Computing

Professional Experience

IBM

Taipei, Taiwan

Technical Product Consultant | Customer Transformation Service Line (B to B to C)

Jul 2022-Sep 2024

- Spearheaded the development, **launch, and continuous iteration** of **customized mobile banking applications** for 2+ Global 500 banks, resulting in 6M+ downloads, 800K+ user reviews, and a 4.5/5 App Store rating.
- Defined and prioritized **product roadmap** features by synthesizing insights from 50+ customer interviews, competitor analysis, and user behavior data, aligning product vision with client business goals.
- Designed **system architecture** and built 50+ interactive **wireframes** and **prototypes** in Figma/Axure with design teams, improving usability and reducing customer complaints by 80%.
- Translated business needs into 40+ **product requirement documents** (20+ API schemas and 30+ database structures) and integrated **AI-powered personalization features**, enabling scalable solutions for 4.8M+ active users.
- Resolved product challenges by clarifying requirements, **making trade-offs** with business units, and aligning diverse stakeholders, delivering 50+ new functions that balanced end-user needs with business and technical objectives.
- Led **cross-functional collaboration** among 30+ engineers, designers, and business partners by leveraging **Agile practices** and adopting tools to enhance visibility, manage milestones, and facilitate multifunctional tasks, achieving the on-time launch of mobile banking apps with 300+ features.

KPMG

Taipei, Taiwan

Technical Program Intern | Financial Risk Management Department

Jul 2021-May 2022

- Developed a **data visualization app** in Python (NumPy, Pandas, and NetworkX) to map relationships between bank employees and customers, strengthening internal controls and mitigating scam risks.
- Built **SQL-based ETL pipeline**, refactoring queries to reduce complexity and ensure scalability for growing datasets.
- Enhanced scam detection accuracy to 90% through data visualization, improving the quality of internal insights.

Selected Projects

MiniTorch Building | *Machine Learning Engineering*

Sep 2025-Dec 2025

- Built a **library** (MiniTorch) by using Python with incremental modules and full test coverage for learning machine learning
- Implemented foundational **machine learning components** (e.g., backpropagation, optimizers, loss functions) to replicate Torch's API in a lightweight, incremental design
- Designed and executed **unit tests** with **Pytest** and **Hypothesis** to ensure correctness, clean code, and maintainability

Mixed Reality Project for Health Care | *Graduation Project, 1st Place (16+ Teams)*

Sep 2020-Dec 2021

- Developed a Mixed Reality system by using Microsoft HoloLens to detect and alleviate Alzheimer's disease
- Conducted **user research** to **define product requirements** and brainstormed technical solutions by event storming strategy, prioritizing 5+ user stories and 5+ MVP functions.
- Defined **roadmap** and managed **full project lifecycle**: User research, UI design, system architecture, and implementation.
- Built and deployed the system on **cloud** (Microsoft Azure) to securely store and manage user behavior data.
- Designed **SQL databases** for real-time data integration and visualization on a cloud-connected **dashboard in Python**.
- Led and coordinated a 5-person team, facilitated meetings, **tracked milestones**, and **delivered prototypes**.
- Presented our product with 200+ audiences and awarded 1st place for delivering a deep research and innovative solution.
